DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The examiner has considered the information disclosure statement (IDS) submitted on 5/10/05.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ayano et al. (6,377,479).

Ayano et al. disclose a power conversion system in Figs. 1, 4, 8, 12 and 13. A common mode choke (3) connected between alternating current output terminals of the power converter (2) and input terminals of the alternating current circuit (5) and connecting means (7) that connects an outgoing line from a neutral point (6) of the alternating current circuit to a reference potential point having little potential variation at a power source system side of the power converter, resistors (92) and capacitors (91). Applicant further argues that Figs. 9-13 of Ayano, line 7 does not connect a neutral point of motor 5 to a reference potential point. The neutral point of motor 5 is at element 6,

which, as illustrated in Figs. 9-13 of Ayano, is not connected by line 7 to the reference potential point. Applicant's attention is directed to Fig. 8 shown below which clearly shows the neutral point of motor 5 elements 6, which is connected to line 7.

FIG. 8

Applicant further argues that the common mode choke is not connected to the direct current voltage input. Applicant's attention is directed to Fig. 11, which shows common

FIG. 11

mode choke (35) connected to the input of the direct current voltage.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
